# Fleet Management
Data reports

When you have access to Fleet Management software, you have access to all the information necessary to compile comprehensive reports which can lead to:

- More efficient work and travel plans
- Improved diagnostic capabilities
- Reduced mechanical and maintenance costs
- Transparency regarding how your equipment is handled

Fleet Overview

Fleet Management technology protects your assets by transmitting live vessel updates. While your Fleet Overview page (pictured above) will provide you with a visual representation of where your vessel has been, your Engine Trends (pictured below) will reflect engine activity.

Engine Trends

Fleet Management
Data reports

MarineNav's Fleet Management software enables you to access vessel information from your computer, tablet or smartphone.

In addition to accessing your information online, you can export your data to a .CSV file. This means that you can organize your information through an application such as Microsoft Excel.

When you register to take advantage of Fleet Management Technology, MarineNav will provide you with 12 free data reports that can be requested at any point. While you get accustomed to our software, you can simply ask us to compile a report specifying whatever time period and vessel(s) you wish.
